

WackiBANDZ™ TREE

To make the Wackibandz tree you will need glue, a pair of scissors and an A3-sized piece of cardboard. Make sure you get an adult to help you. Children under 12 require adult supervision when using scissors or glue.

1. Colour your tree. Make sure to use lots of different colours for the WACKIBANDZ on top of the tree.
2. Glue each of the sheets onto a piece of cardboard and wait for them to dry.
3. Cut out the two tree shapes. Be careful with the slits in the middle of the trees. The slits might have to be narrower or wider depending how thick your cardboard is.
4. Slot your tree together using the slits – Part A will be the top, and Part B the bottom.
5. Use Wackibandz to strengthen your tree. Place Wackibandz around the trunk and around the branches that are next to each other (just like in the picture below). The more Wackibandz you use, the stronger the tree will be.
6. Now you have a place to put your Wackibandz when you're not using them.
